

**Pet bottles were converted into vehicle with “This work is involved with SCIENCE!” project**

“**This work is involved with SCIENCE!**” project conducted by Coşkunöz Holding the first one in this year was ended for children to spend pleasant time with their parents by increasing children’s sympathy to science and environment. After completion of workshops organized in **Bursa Science and Technology Center** in 08-09 October, **a car was built with real dimensions using 3 thousand pet bottles** collected by the children to increase children’s environmental awareness.

The car that was built by children using pet bottles with real dimensions **was debuted for the first time during fixing plate ceremony conducted in BTM (Bursa Technology Center) on 09 October 2016 Sunday at 13:30.** General Manager of Coşkunöz Metal Form A.Ş. Aptullah Saner and General Manager of Kultur A.Ş subsidiary of Bursa Municipality Ömer Furkan Banaz fixed the plate including the foundation date of Coşkunöz Holding and initials on the car.

It is aimed the children aged 7 and 12 years to gain scientific and creative sub-skill of thinking by the way of experiments in the “This work is involved with SCIENCE” activity that was initiated with “child and environment” theme this year and will continue in the following years. Children experienced with science experiments for two days found an opportunity to meet with dinosaur returning to prehistoric ages after made a short space journey in Planetarium, understanding the operating principle of the materials and mechanisms they faced in daily life in “Hydraulic System (Pneumatic)” workshop.

The car that is to be exhibited for one week in BTM that is most comprehensive science center in Turkey in the manner of testing apparatus, manufacturing of testing apparatus, scientific activity and work shop studies, afterwards it will be continued to be exhibited to create environmental awareness in various institutions and schools.
