

Children saved the world with science

More than 200 children brought together to save our planet with the scientific activities within the context of “This work is involved with SCIENCE” project Coşkunöz Holding. The children at the age of 7-13 were participated in scientific workshop studies at the stages of “My home”, “My district” and “My world” at the ceremony performed in an environment that is in touch with nature with “We save the world” theme on 24 September Sunday.

The children acquiring significant information on reducing carbon footprint established heroic narratives at the stage of “My story” following activities of planting, waste decomposition, establishing recovery robot. Thereafter, they painted the World they saved. The children found opportunity to watch the Sun with telescope by starting a space journey altogether passed moments of pleasure by accompanying bubble blower show and dances. After activities, this beautiful day was ended with a family photo for the day of remembrance.

Coşkunöz Holding Corporate Communication Department Manager Gülnur Seymen said: “We are conducting second “This work is involved with science” program this year that we accomplished it with the cooperation of Science Technology Center being as Coşkunöz Holding last year. Our aim is let children loving science by experiencing. We made recovery vehicle with 3000 pet bottles last year. This year, we saved the planet. The children have learnt how to save their future”.
